

Dear Sirs,

I, my family, and many of our friends and neighbors listen to KLVJ radio affiliated with K-LOVE, stationed in Julian, approximately 40 miles away from our home.

We are concerned that new Low Power FM stations created under this license will interfere with our ability to receive this station.

KLVJ provides the community with wholesome, uplifting, commercial-free music which is much appreciated in these stressful times.

If this station is not available, I fear the only roughly comparable programming we could reliably receive would be from the XM or Sirius paid radio service, a solution which is too costly.

I believe others would be in a similar situation in other areas of the country. Please act to preserve this valuable service.
